

FCE Mentorship

Home Study Courses and Live Seminars are great ways to learn about the Blankenship FCE System. However, real world patients and situations are complicated and ever changing. Additionally, the Blankenship FCE System is extensive and learning the complexities and becoming proficient will take time. The FCE Mentorship provides the ability to share and discuss how an FCE was done and reflect on possible omissions or areas to change/improve upon with a Blankenship FCE Instructor on a monthly basis. You chose one FCE per month to send to a Blankenship FCE System Instructor. The Instructor will review the FCE and communicate feedback in an effort to grow your understanding of the Blankenship System FCE process. It allows for you to ask direct questions and get direct feedback on an ongoing basis until you feel comfortable with the process. The Blankenship FCE System wants to ensure you have the ability to continue to learn and grow within the system. Providing a mechanism to continue to interact with a Clinical Instructor is the best way to ensure continued growth of an FCE provider.

Included:

One FCE per month submitted to a Clinical Instructor who will review the FCE and communicate possible improvements or answer questions the FCE provider may have.

Cost: \$600 per year
